Sheffield BSF Building Schools for the Future

Project Details:

Over the next 10 to 15 years the Government is investing in every secondary school across England. The scheme hopes to renew or rebuild every secondary school in the country, this is known as Building Schools for the Future (BSF).

Educational Needs (SEN) school. Along with the refurbishment of High Storrs and Firth Park and the design and build of a brand new SEN school in the north of the city.

Extranet Details:

Taylor Woodrow selected 4Projects® because they were looking for a collaboration solution partner with a track record for managing major programmes of work.

Users	289
Drawings	6,511
Documents	38,565
Statistics Date:	January 2008

The BSF Programme began in 2005 and was divided into different phases over 15 years. Five local authorities were selected by the Government to lead the way for the BSF scheme. Sheffield County Council was chosen as one of these pathfinder authorities.

Sheffield BSF is one of the largest schemes in the Government funded project. The County Council selected one of Britain's largest construction companies, Taylor Woodrow, to ensure every secondary school in Sheffield is rebuilt or renewed within the next three years.

The £158million project will involve rebuilding the following secondary schools: Newfield, Silverdale, Yewlands and Talbot Special

A key requirement was to allow different supply chains access to different projects. The 4Projects collaboration solution allowed Taylor Woodrow to keep each school separate, whilst keeping all project information within the one extranet. The discussions module was used to replace email chains and to manage communications and commenting within the projects.
